

Water is essential to life, yet around the world

2.2 people lack access to safe, clean drinking water
BILLION

4.2 people lack access to safely managed sanitation
BILLION

4 people experience severe water scarcity at least one month per year
BILLION

200 hours are spent each day by women collecting water
MILLION

3 people die each year as a result of water-related diseases
MILLION

We are proud to work with our partners to help create access to safe, clean water, sanitation and hygiene (WASH) in vulnerable communities around the world.

Since 2010, more than **8.6 million** lives have been changed by partnerships across 76 countries that deliver sustainable WASH programs.

Latin America

572,000

people reached through 8 programs in 14 countries

Africa

4,360,000

people reached through 3 programs in 41 countries

Southeast Asia

288,000

people reached through 9 programs in 7 countries

India, Bangladesh & Sri Lanka

426,000

people reached through 6 programs

China

2,900,000

people reached through 2 programs

WASH programs are funded by The Coca-Cola Foundation and bottling partners and are implemented by partners such as Global Environment & Technology Foundation, the Alternative Indigenous Development Foundation, Population and Community Development Association, Water and Sanitation for the Urban Poor, WaterAid, CARE, and Water For People, among others. Programs are supported by co-funders including USAID through the Water and Development Alliance, One Drop Foundation, and the Inter-American Development Bank.**

*The total number of beneficiaries includes the regional totals and beneficiaries of programs in other countries. Calculations include both independently assured data and preliminary data from recent projects.

**While not every partnership can be listed, all of our partners are equally appreciated and valued for their commitment to deliver WASH to communities in need.

Global water data sourced from World Health Organization and UNICEF.

ACCESS TO WATER CHANGES LIVES

ngeline's life has been transformed since she donated land for a RAIN water kiosk. Now, instead of spending her day collecting and boiling water, she and her neighbors have clean drinking water and her time is better spent with family and community.

When Shirley's husband was injured she had to walk for hours every day to get the water needed for his recovery. Thanks to a new hydraulic pump in her village, she now has easy access to water and more time to spend with her family.

Christiana once started each day with a three-hour trek to collect water for her family. Now the new road that runs through her property, enables her and her neighbors to have access to safe water in a matter of minutes.

We support the Sustainable Development Goals and are partnering to help create opportunity for people through access to safe and improved water services, sanitation and hygiene.
